

## Cisco Model EPC3208 EuroDOCSIS 3.0 8x4 Cable Modem with Embedded Digital Voice Adapter

The Cisco® Model EPC3208 EuroDOCSIS 3.0 8x4 Cable Modem (EPC3208) is a high-speed cable modem with an embedded digital voice adapter. The EPC3208 provides a faster connection to the Internet by incorporating eight bonded downstream channels along with four bonded upstream channels. These bonded channels deliver downstream data rates in excess of 440 Mbps. That's up to eight times faster than conventional single-channel EuroDOCSIS™ 2.0 cable modems.

The EPC3208 uses advanced line-interface technology to provide multi-country, toll-quality telephone service using existing in-home wiring. The EPC3208 features single-line or two RJ-11 telephone ports for voice, and supports a total of 10 REN loading, 5 REN per phone line.

**Figure 1.** EPC3208 EuroDOCSIS 3.0 8x4 Cable Modem with Embedded Digital Voice Adapter (image may vary from actual product and specification)

The EPC3208 is designed to meet EuroPacketCable™ 1.5 and EuroDOCSIS 3.0 specifications as well as being backward compatible with EuroDOCSIS 2.0, 1.1, and 1.0 networks. The EPC3208 fully supports the CODECs specified in PacketCable 1.5. Additional CODECs are available through a software upgrade that includes a high-fidelity CODEC option for toll-quality plus service. Standard VoIP call signaling is compliant with PacketCable (MGCP/NCS) specifications. Software upgrades are available to support Session Initiation Protocol (SIP) call signaling.
